

CLINICAL TRIALS FOR EVERYONE, ANYWHERE

About Us

VirTiral is a proven platform that enables sites to participate in hybrid clinical trials by providing patients virtual visits powered by encrypted video, audio, chat, and messaging capabilities.

Why Us?

- ✓ Enables sites to expand their geographical reach
- ✓ SCRS member sites provided platform training to become "Virtual Trial" certified
- ✓ Empower under-representated patients to participate in clinical studies

Our Features

BYOD

VirTiral platform works on any device, enabling a site experience from the comfort of a patient's own device.

NOTIFICATIONS

Secure messaging and notifications help sites engage and monitor patients, improving study retention.

ENGAGEMENT

Providing flexible technology for the patient encourages engagement, resulting in better study outcomes.
